PacForex front office application is a powerful and feature-rich component of the solution that guarantees best user experience to the traders offering great number of tools to make their trading easy and efficient; ensuring higher retention rate.

## **Flexible Trading**

Traders can trade and implement any strategy with flexibility and instant execution like never before.

PacForex front office provides the following:

- Fast execution
- 3 execution modes
- Stop Loss and Limit Profit orders
- Monitor market trends in real time
- Integrated one-click trading directly from the chart
- Apply any indicator on the go
- 9 timeframes and unlimited number of customized charts

## **Advanced Watchlists**

PacForex allows traders to monitor instruments and symbols with advanced watch lists or Quote Boxes via its front office, providing accessibility like never before.

Traders can:

- Open quote boxes
- Customize and edit the symbol and volume for each watch list/box
- Quickly navigate through the list as and when needed
- Check the changing status list/quote box in real time
- Place and customize the order right from the quote boxes

## Advanced Charting

PacForex charts visualize changes in currency, stock and other security quotes. By providing advanced technical analysis and operation of EAs, charts let traders visually monitor quotes in real time and respond instantly to any changes in the market. A variety of different settings lets traders customize and adapt settings to their personal requirements.

Charting features include:

- Monitor market trends in real time
- Integrated one-click trading directly from the chart
- Apply any indicator on the go
- 9 timeframes and unlimited number of customized charts

Pac Forex supports three types of charts: line, bars and candlesticks. Traders can customize the UI by setting separate colors for any item in the chart to create a workplace that lies in their comfort zone.

Traders can also save color schemes and analytical objects applied on a chart. The platform offers more than 80 of the most popular analytical tools: technical indicators and graphical objects, providing an unparalleled charting analytics experience.

## **Tehnical Analysis**

Traders can detect trends and patterns, consisting of various indicators on symbol charts for identifying trends and analyzing the market at any level of complexity.

Features include:

- Forecast the future price dynamics
- Define market entry and exit points
- Set Stop Loss and Take Profit levels
- Access and choose from our extensive list of 65+ indicators

## **Market News**

The platform provides latest market news and allows traders to stay alert with all the financial trends, helping them make informed business decisions.

Market news incorporates the following:

- Financial information
- Different market news and conditions
- Timely notifications

PacBot allows automation of the analytical and trading processes in the PacForex trading platform. Access both platforms, PacBot uses the same account, without additional signups. Test any trading strategy on any prior time to gauge your strategic plans seamlessly by **Back Testing** expert advisors. Moreover, formalize and implement any trading strategy with Expert Advisors to let it do all the work for you while you sit back and relax

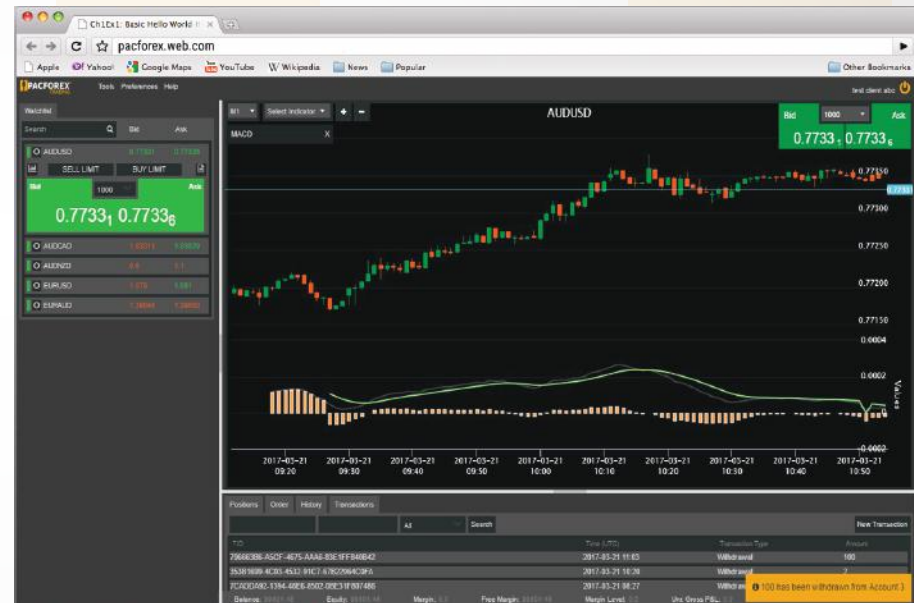

- 30+ pre-available indicator list
- Create custom indicators to run within PacForex
- Easily develop, test and apply algorithms
- Built-in code editor with search fields
- Take advantage of C# libraries
- Easy to use and intuitive Graphic User Interface (GUI)
- Controlled trading and analytics
- Library of free codes
- Test strategies by back testing
- Instantaneous results to make informed trading decisions
- Use both platforms with the same account
